

NGUYEN HOANG QUY

Fullstack Developer

hoangquy4874@gmail.com | 0338259747 | Thành phố Hồ Chí Minh | [Linkedin](#)

SUMMARY

I am a Fullstack Developer with 1+ year of experience in developing enterprise web applications using React.js, Next.js, Vue.js, Node.js, NestJS, and TypeScript.

Experienced in building scalable frontend systems, RESTful APIs, and database-driven applications. I enjoy solving technical problems and continuously improving my skills in backend development and software architecture.

EDUCATION

Nong Lam University

2021 – 2026

Information Technology

Completed (Awaiting Degree Certificate)

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, Java, C#

Frontend: React.js, Next.js, Vue.js, Nuxt.js, HTML5, CSS3

Backend: Node.js, NestJS, ASP.NET Core, RESTful API, JWT Authentication

Database: PostgreSQL, MySQL, SQL Server, Prisma ORM, Entity Framework

Tools: Git, GitHub/GitLab, Jira, Postman, Swagger, Docker, Agile/Scrum

State Management: Redux Toolkit, Zustand, Context API, React Query

AI-Assisted Development: Codex, Claude, Cursor, AI-DLC workflow, Technical research

Soft Skills: Problem Solving, Team Collaboration, Time Management, Communication

English: TOEIC 700

WORK EXPERIENCE

PNJ – Phu Nhuan Jewelry Joint Stock Company

01/2026 – 07/2026

Frontend Developer

Worked on PNJ's HRMS Performance Management System (PMS), an enterprise application for KPI management, employee evaluation, approval workflows, and reporting.

- Maintained and enhanced existing frontend modules by fixing bugs, refactoring components, and improving code quality following clean code principles.
- Improved frontend architecture, component reusability, and application maintainability through code organization and optimization.
- Collaborated with team members to analyze issues and deliver stable solutions for business requirements.

Technologies: React.js, Next.js, TypeScript, Material UI, React Query

Frontend – Fullstack Developer

Worked on multiple business applications including enterprise ERP systems, Bee Coffee Platform, and management solutions.

Key Projects:**Bee Coffee Platform (Fullstack Developer)**

- Developed customer website and admin dashboard independently on the frontend side, including product, branch, voucher, and order management features.
- Built backend CRUD APIs for product and category management and integrated RESTful APIs with frontend applications.

Enterprise ERP System (Frontend Developer)

- Developed and maintained enterprise modules including approval workflows, reporting, contract management, and business operations.
- Enhanced approval processes by implementing primary and secondary approval flows, developed new modules, and improved code maintainability through bug fixing and refactoring.

Ad Exchange Platform (Frontend Developer)

- Developed media and product management modules with CRUD functionality and implemented API integration with state management solutions.

Technologies: React.js, Vue.js, Nuxt.js, TypeScript, Node.js, NestJS, PostgreSQL, RESTful API, Redux, Zustand, Context API

PROJECTS**Online Food Ordering Website****Fullstack Developer**

Developed a fullstack food ordering platform with customer and administration features.

- Built RESTful APIs using NestJS with JWT authentication and role-based authorization.
- Designed database schema and implemented data management using Prisma ORM and MySQL.
- Developed frontend-backend integration for product, order, and user management workflows.
- Github: <https://github.com/daihoc24/TieuLuan.git>
- **Technologies:** React.js, TypeScript, NestJS, Prisma ORM, MySQL, REST API, JWT Authentication

Selling Lunch Platform**Fullstack Developer**

Developed a fullstack food ordering platform with customer and administration systems.

- Built frontend interfaces using React.js and TypeScript for product browsing, cart management, ordering, and user interactions.
- Developed backend CRUD APIs using ASP.NET Core (.NET 8) for products, categories, users, and order management.
- Applied layered backend architecture with Controllers, Services, and Models to improve code organization and maintainability.
- Github: <https://github.com/ngtphan/sellinglunch-9.git>
- **Technologies:** React.js, TypeScript, C#, ASP.NET Core (.NET 8), REST API, SQL Server

Movie Ticket Booking API System

Backend Developer

Developed backend APIs for an online movie ticket booking system.

- Designed RESTful APIs for movies, cinemas, showtimes, and ticket management.
- Implemented authentication and authorization using JWT.
- Designed database schema using Prisma ORM and integrated API documentation with Swagger.
- Demo: <https://youtu.be/VAatchPZn73O?si=wXG66ZkBsPp5l4iu>
- Github: https://github.com/huy-devsg/node36_cuoi_khoa_movie-api
- **Technologies:** NestJS, TypeScript, Prisma ORM, MySQL, JWT Authentication, Swagger

CERTIFICATES

TOEIC LISTENING & READING – 700 | 2026

SQL (ADVANCED) CERTIFICATE (HACKERRANK) | 2026

PROFESSIONAL FRONT-END DEVELOPER (CYBERSOFT) | 2024

PROFESSIONAL NODE JS DEVELOPER (CYBERSOFT) | 2024
